EXPERIENCE

Senior Data Analyst, Strategy	Pure Storage	Mar 2022 - Present
--------------------------------------	---------------------	---------------------------

- Recommended an automation of 3k quotes to the CFO by estimating Deals Desk team workload to reduce workload by 15% with deal velocity program
- Advised CFO by estimating value of new customers with account quality metrics and segmentation
- Generated margin uplift through modelling and implementation of pricing AI model in *Salesforce*
- Corrected \$100M in pricing losses annually using text analysis, AI, and LLMs in *ChatGPT*
- Calibrated reporting by cleansing \$300M in void pipeline annually and expanded competitor data by parsing with regex and *Snowflake* SQL
- Mitigated \$10M annual revenue leakage by validating *Salesforce* program approval mechanics
- Enhanced and maintained a sales tool responsible for \$100M marketing campaign
- Supported global finance and sales analytics through feature engineering and optimizing *SnapLogic* data pipelines for *Snowflake* cloud data warehouse

Senior Consultant	EY (Ernst & Young)	Oct 2020 - Mar 2022
--------------------------	-------------------------------	----------------------------

- Secured \$600k renewal by delivering new features and onboarding to cloud *UiPath* for \$60B Financial Services client and contributed to \$400k contract renewal for \$100B federal department
- Fulfilled over \$1B savings implementing a *Guidewire* transformation by defining acceptance criteria for prioritizing Agile user stories in *Jira*, analyzing data using *Oracle SQL*, and presenting technical concepts for \$5B Crown corporation
- Developed pre-sales *ServiceNow* contact center proof of concept in a Request for Proposal

Staff Consultant	EY	May 2018 - Oct 2020
-------------------------	-----------	----------------------------

- Decreased workdays needed with ETL of accounting data using *Alteryx*, *Power BI*, and *DAX* for \$50B Financial Services client
- Generated annual savings of \$60k by automating SOX testing in *Blue Prism* for \$10B Energy client

Data Scientist	Key Projects	2017 - Present
-----------------------	---------------------	-----------------------

- Optimized predictions using over 3M customer orders by transforming data with multi-threaded and distributed *Pandas*
- Visualized over 1B taxi trips by deploying an *Airflow* data pipeline, ingesting a *Google Cloud Storage* data lake, and transforming with *dbt* to a *BigQuery* data warehouse
- Generated sentiment analysis of films with natural language processing (NLP) in *Keras* and forecasted US flight delays with *TensorFlow*

EDUCATION

Bachelor of Business Admin	Simon Fraser University	Sep 2017
-----------------------------------	--------------------------------	-----------------

- Management Information Systems, CGPA: 3.71, Vancouver, BC

ADDITIONAL INFORMATION

- **Skills:** Power BI, DAX, Tableau, SQL, Snowflake, Alteryx, KNIME, Python, Google Cloud Platform (GCP), Databricks, Azure ML, Alation, JIRA, Azure DevOps, Docker, Salesforce, Guidewire PolicyCenter, APIs
- **Recognition:** Celonis Data Engineer, Azure Data Scientist (DP-100) and Data Analyst Associate (DA-100), Reliability Status (GC), Top 10 in EY Codewars
- **Interests:** Fitness, financial literature, discovering new music, photo editing, mimicking accents
